

Profile of Some important Chinese Companies

(some are stock listed companies in NYSE

Or in Chinese Stock Exchange)

1. Design & Digital Technology Services Ltd

www.ddts.com.cn

DDTS is a high value engineering service provider from China specially focused on Digital Engineering Design, engineering data conversion and plant EDMS development and implementation services, Digital Handover, Digital Operation and Maintenance.

DDTS' typical clients in EDMS and drafting fields includes SABIC from Saudi Arabia, ADNOC from UAE. And we're also accumulating abundant project experience and enjoying good fame in offering data conversion service to many owners or EPCs at domestic and overseas, such as TAKREER of UAE, Caxperts of Germany and so on.

Hope to meet with Owners and EPC of Oil&Gas and Chemical industries in UK and European Countries in need of our services.

2. FUJITSU NANDA SOFTWARE TECH CO., LTD

www.fujitsu.com/cn/microsite/fnst

Providing professional outsourcing services and internationalization consulting services as well as selling various software products to our customers.

Main product:

- Linux kernel development
- Digital Solutions
- Intelligent Vehicle software development

- Cloud computing solutions

Want to meet with companies in the fields of automobile, logistics, government, finance, manufacturing, and software R&D, etc. in need of outsourcing software projects in whole or in parts.

3. Jiangsu NJUE Electronic Information Technology Co., Ltd.

www.njuelectronics.com

A domestic influential service robot overall solution provider, specializes in development and construction of intelligent service robot and intelligent cloud service platform.

Self-developed ADDASOUND intelligent service robot system, combined with artificial intelligence, big data, internet of things, cloud computing and 5G technology and loaded with intelligent cloud services platform, machine vision, machine hearing, voluntary movement navigation and intelligent environment perception can provide services of smart actively welcome reception, business consulting, precise guidance and diversion, intelligent business service, scenario-oriented precise marketing, intelligent hall management etc.

Cooperation Desired: purchasing or leasing our products.

4. RongLehan Electronic Technology Co.,Ltd

A professional software product development and service outsourcing provider with rich development experience in enterprise information management and data resource integration, and combines with the Internet (including mobile Internet), LBS, mobile phone application software, etc., to provide customers with software and information integration solutions.

Our product:

OA system, health insurance system, ERP, CRM. software drivers for medical

devices.

Hope to meet with companies in need of provider of software and information integration solutions or hope to cooperate in technology of information integration solutions.

5. Xiaoni Intelligent Technology Co.,Ltd

www.xnzn.net

A company relying on its reading and writing technology, face recognition technology, dish recognition technology, launched a number of industry-leading solutions.

Main solutions:

cafeteria self-selected food line, intelligent production system, weighing and measuring buffet system, time counting buffet, window payment and consumption system, self-service food ordering system, food ordering and taking system.

Main products:

Intelligent counter, face recognition billing desk, intelligent insulation platform, weighing and measuring buffet, consumer's face recognition machine, self-service recharge machine, self-service ordering machine, dual screen consumer.

Cooperation desired: meet with customers who are interested in our products and solutions. Channel cooperation, electronic marketing are OK.

6. Softtek Information System (Wuxi) Co., Ltd www.softtek.com

A leading global provider of information technology and business process services.

Main Service:

Application customization development, software testing and quality assurance, application maintenance and support, mobile terminal development services,

big data development, etc. IT infrastructure support management services; New retail channel solutions Pharmaceutical industry solutions; Intelligent voice emotional risk control solution; Business process outsourcing;

Seeking for cooperation in the following areas:

The Company with a registered capital of RMB 10.5 million is a national high-tech enterprise specializing in communication, information and software and hardware technology services.

Business covers local network, equipment installation, indoor distribution,

integrated dimension generation and other services.

The service is applied in the field of communication infrastructure construction of operators.

Hope to cooperate with communication operators, communication equipment providers who are interested in our products and service.

9. Jiangsu Fengyun Technological Service Co., Ltd

www.fengyuntec.com

A professional smart city + big data service provider, providing the whole process solution of Smart Park solution Project.

The company has ITSS, CMMI5, ISO9001, ISO27000 and other important honorary qualifications. The company has accumulated 16 years of professional service experience.

We want to meet with customers who need Smart Park solution, professional smart city + big data service for cooperation.

10. Whale Cloud Technology Co., Ltd

www.iwhalecloud.com

A leading technology company specializing in telecom software development and delivery, cloud computing, big data analytics, AI-enabled service operations, IOT, smart city solutions and other professional services, including planning and consulting.

Founded in 2003, the company provides services to various market segments including telecom operators, governments, and enterprises around the world. It has built its core competitiveness in communications software, operation services, cloud computing, big data analytics, AI, and Internet architecture.

Looking for potential customers and partners who are interested in our service and technology.

11. Ennfu Scientific Company Limited

www.ennfu.com

Mainly focus on providing personalized customization service for IOT controller of 4G Sharing Scooter/Ebike and other customized solutions relative RF IOT technologies.

IOT controller of Sharing Scooter is used in Sharing Scooter renting business to achieve real time GPS tracking and unlock/lock control.

Seeking for cooperation with supplier and operators of sharing scooter and e-bikes for customers who need personalized customization service.

12. Thundersoft Software Technology Co., Ltd

www.thundersoft.com

Provide complete differentiated solutions for smart phone, tablet and wearable devices. These solutions cover driver adaptation, special component development, OS tailoring, power and performance optimization, multi-domains, customized ROM, etc. With the solution, a highly customized wearable-OS meets the unique wearable requirements of low power consumption, minimum memory footprint and a high connectivity capability.

Main Application: Intelligent terminal, intelligent Internet of things, car factory.

Hope to meet with the enterprises interested in our products and technologies for cooperation.

13. Nanjing New May Co., Ltd.

A Mart Emergency Partner.

Main Products: wireless fire warning system, mobile modular fire station, intelligent emergency booth, chemical industrial park safety monitoring and early warning system, major hazard source online monitoring and early warning system, special Robots (fire fighting robots, anti-terrorism robots, etc.)

We hope to meet with enterprises or institutions that are in need of smart fire protection and smart city solutions, and are interested in our products and technologies for cooperation.

14. Aispeech Technology Co., Ltd

www.aispeech.com

Aispeech focuses on human-oriented intelligent voice interaction technology, providing natural language interaction solutions for enterprises and developers, including Dui open platform, enterprise level intelligent services, man-machine dialogue operating system, artificial intelligence chip module, etc.

Main Application: Internet of vehicles, IOT, finance, office, government affairs, medical treatment, real estate.

Look for customers who need our service and technology in the fields of finance, insurance, real estate and Internet of vehicles and etc.

Cooperation Mode: technical cooperation and service outsourcing.

15. Nanjing Liandi Information Systems Co., Ltd

www.liandisys.com.cn

Our Company has been undertaking consulting, design, development and testing of software application information systems and providing technical maintenance services after delivery.

The software is used in finance, insurance, securities, electricity, telecommunications, aviation, public security, government affairs, office, public, e-commerce platform, medical and health care, enterprise business,

information management, advertising, sales and circulation.

Look for customer cooperation in service outsourcing software.
