

CBBC DELEGATION: DISCOVER CHINA'S EMERGING TECHNOLOGIES

- **Date:** Mon- Fri, 25 - 29 May 2026
- **Location:** Beijing, Wuxi, Suzhou, Shanghai

The China-Britain Business Council (CBBC) invites UK technology and innovation companies to join our flagship multi-city delegation to Beijing, Wuxi, Suzhou, and Shanghai. Designed specifically for the tech sector, this high-level programme will connect UK technology and innovation businesses with some of China's most dynamic regional economies and policy pilots, opening doors to commercial partnerships, R&D collaboration, and market entry across four of the country's most dynamic cities.

Over the five-day programme, participants will have the opportunity to:

- Receive guided access to China's leading tech parks, incubators, and R&D campuses
- Meet directly with founders, CTOs, and business development leads at pioneering technology companies
- Engage with municipal innovation bureaus and industrial park authorities shaping China's next-generation tech policy
- Participate in sector-focused roundtables across clean tech, industrial AI, smart cities, and the digital economy
- Attend curated B2B matching sessions aligned to your specific commercial and partnership objectives
- Build a lasting network of peers, counterparts, and collaborators across China's most productive innovation ecosystems

Please click [here](#) to register your interest to join the delegation.

For direct enquires: Mark.Xu@cbbc.org

Note: Participation in the delegation is free of charge; however, attendees are responsible for their own travel costs.

ITINERARY OVERVIEW

CBBC invites British companies to join our upcoming five-day immersive programme focused on China's emerging technologies. The detailed daily schedule will be shared with registered participants before the tour.

DAY 1 MONDAY 25 MAY 2026, BEIJING

MORNING - VISIT BEIJING'S MUNICIPAL SUBCENTRE TONGZHOU DISTRICT

About the Tongzhou District (北京市通州副中心) Tongzhou is designated as Beijing's Municipal Subcenter with enormous future development potential. Tongzhou is committed to building a scientific and technological innovation platform for Beijing and improving the city's comprehensive urban supporting functions.

- **Visit to Beijing Digital Intelligence Innovation Center (数智北京创新中心)**

The centre aims to leverage Beijing's innovation resources to build a real-scene, real-data urban experimentation sandbox, deploy miniaturized smart city public infrastructure, and establish secure and trusted channels for public data integration.

- **Visit to China Resources Recycling Group New Energy Jinwu Technology (Beijing) Co., Ltd (中国资源循环集团新能源劲吾北京科技有限公司)**

The company specializes in the technological innovation and application of full-colour optoelectronic functional materials. Participants will gain on-site insights into the cutting-edge technological innovations and application scenarios in the circular economy sector.

- **Business Lunch with local authorities (商务午餐)**

Face to face dialogue with local officials of Beijing to learn about its high-tech industry development, key enterprise profiles, and supportive policies for the landing and growth of foreign businesses.

AFTERNOON – VISIT BEIJING ECONOMIC-TECHNOLOGICAL DEVELOPMENT AREA (BDA)

About the Beijing Economic-Technological Development Area (北京经济技术开发区) It strives to build itself into a citywide hub for artificial intelligence and a full chain innovation ecosystem covering data, computing power, models, and applications has been formed.

- **Visit to Xiaomi Headquarters (小米集团)**

Xiaomi is a leading consumer electronics and intelligent manufacturing company focused on smartphones, smart hardware, and IoT platforms. It has also become a globally renowned new energy vehicle manufacturer.

- **Visit to the Robot Mall (机器人大世界)**

This is Beijing's first full-category robot exhibition centre, located in Yizhuang, Beijing. It is an all-category robot hub featuring "robot exhibitions + application experiences".

DAY 2 TUESDAY 26 MAY 2026, BEIJING

MORNING – VISIT BEIJING GO GLOBAL HUB FOR DIGITAL ENTERPRISES

- **Visit to Beijing Go Global Hub for Digital Enterprises (北京数字经济企业出海创新服务基地)**

It is China's first government-led, market-oriented one-stop service innovation platform dedicated to supporting the global expansion of the digital ecosystem.

- **Roundtable Meeting with Chinese Tech Enterprises (北京科技企业座谈会)**

Face-to-face dialogue with innovative technology companies based in Beijing at the Go Global Hub, focusing on their technological progress, business development, and global expansion strategies.

- **Lumverse (北京渲光科技)**

Lumverse is a professional 3D graphics engine company with deep graphics expertise and extensive industry experience. It has a full-stack, top-tier R&D and product team with nearly 20 years of accumulated know-how in computer graphics.

- **Johnsmith.ai (集思科技)**

A pioneer in AI virtual human e-commerce live streaming, Johnsmith.ai serves as an AI live streaming provider for world-renowned groups including LVMH, L'Oréal, Estée Lauder, Procter & Gamble, and Winner Medical.

AFTERNOON – HEAD TO WUXI BY TRAIN

DAY 3 WEDNESDAY 27 MAY 2026, WUXI

MORNING

- **High-level Meeting with Wuxi Municipal Government (BY INVITATION ONLY)**

Exclusive closed-door meeting and by invitation only, with priority access for senior delegates.

About Wuxi: China's IoT capital, Wuxi turns pilot projects into city-scale infrastructure fast. Home to 3,000+ IoT enterprises across the Wuxi High-New Technology Zone and National Sensor Network Innovation Demonstration Zone, it is a market built for rapid commercial deployment.

- **Visit Wuxi Liangxi Sci-City (无锡梁溪科技城)**

Wuxi Liangxi Sci-City is a key innovation hub located in the Liangxi District of Wuxi, Jiangsu Province. It focuses on fostering high-tech industries such as artificial intelligence, big data, robotics, and the Internet of Things (IoT). The Sci city aims to integrate technological innovation, smart manufacturing, and urban development, serving as a model for digital transformation and industrial upgrading in the Yangtze River Delta region.

- **Visit INMO LENS (影目科技)**

INMO focuses on consumer-grade AR glasses as its core business. It is a pioneer and leader in the wireless AR glasses sector.

INMO AR glasses feature a lightweight, daily life design and wireless all-in-one structure. INMO aims to build the next-generation mobile terminal after smartphones for the metaverse era.

INMO was among the first in China to integrate large language AI models into AR glasses, creating innovative AI+AR scenarios for daily life. It also launched the world's first lightweight wireless AR glasses supporting SLAM and 6DoF tracking, providing a key entry and device for experiencing the metaverse.

AFTERNOON

- **Business Matching Session**

Pre-arranged, tailored meetings with targeted local partners and industry-related organizations. Helps build cooperative relationships, explore markets, and expand business.

- **Head to Suzhou by high-speed train**

DAY 4 THURSDAY 28 MAY 2026, SUZHOU

MORNING

- **High-level Meeting with Suzhou Municipal Government (BY INVITED ONLY)**

Exclusive closed-door meeting and by invitations only, with priority access for senior delegates.

About Suzhou: One of China's most internationally experienced industrial cities, Suzhou combines strong IP enforcement and streamlined approval processes with a mature foreign-invested R&D ecosystem. It is currently home to over 17,400 high-tech enterprises, ranking 4th nationwide.

- **Visit to Suzhou New District (苏州高新区)**

Suzhou New District is one of the first batch of national high-tech zones in China, adhering to the principle of prioritizing industrials and projects. It is committed to building a city of high-end industries. It focuses on enhancing the development of two major pillar industries, namely the new generation of information technology and advanced equipment manufacturing.

AFTERNOON

- **Business Roundtable at UK-China Business Innovation Hub**

Face to face discussions with leading companies based in Suzhou. Helps build cooperative relationships, explore markets, and expand business.

- **Grand Opening of UK-China Business & Innovation Hub**

Brings together senior representatives from the British business community and government. Focuses on key sectors including service trade, healthcare and life sciences, finance, green transformation, and digital economy.

EVENING

- **Dinner**
- **Head to Shanghai by high-speed train**

DAY 5 FRIDAY 29 MAY 2026, SHANGHAI

MORNING

- **Visit to the Shanghai Artificial Intelligence Research Institute**

Visit the exhibition hall of the Shanghai Artificial Intelligence Research Institute to gain an in-depth understanding of the development status, applications and ecosystem

- **Roundtable Meeting with Shanghai Tech Companies**

Hold a roundtable meeting with platform-incubated enterprises of the Shanghai Artificial Intelligence Research Institute, including AgiBot, DexRobot, Mscape, and others.

AFTERNOON

- **Site visit to Westwell**

Westwell is a Chinese national high-tech enterprise founded in 2015, headquartered in Shanghai. A pioneer in AI and autonomous driving for global logistics, it delivers full-stack intelligent and green solutions for ports,

rail hubs, airports, and factories, with commercial deployments across 28 countries and regions serving over 200 clients including Felixstowe in the UK.

EVENING:

- **Briefing and panel for the conclusion**
 - Panel: Doing business in China
 - Fireside Chat: Experience sharing and conclusion

EVENING

- **Reception at Bund FTC**

To conclude the week, CBBC will host a reception at Bund FTZ. Bund FTC serves as an integrated service community for high-quality internet content creators. It operates with a "double FTC" positioning, combining "FinTech Ecosystem Community" and "Internet Premium Content Creation Hub," promoting the convergence of content creation and financial technology. The building was transformed into a "vertical ecosystem community" while preserving its original structure and character.
