

PARTNER TOURS - AUTUMN 2026: EXPLORING CHINA'S TECHNOLOGY AND INDUSTRY ECOSYSTEMS

The China-Britain Business Council (CBBC) is pleased to share four upcoming industry tours organised by our partners at Baiguan and JeeCheeRen. Designed for senior business leaders, investors and innovation professionals, each programme offers participants opportunities to engage directly with the companies shaping China's development in artificial intelligence, robotics, advanced manufacturing and supply chain innovation.

While differing in focus and format, all four programmes aim to provide practical market insights, company access and a deeper understanding of the trends driving industrial and technological change across China.

ROBOTICS & AI EXECUTIVE TOUR

Organised by Baiguan in collaboration with Caixin Data
Beijing | Monday, 19-Friday, 23 October 2026

This five-day programme focuses on China's robotics and AI ecosystem in Beijing.

Curated by Baiguan and **Caixin Data**, this tour cuts through the noise to take you deep into the industrial value chain—from mass-production lines for core hardware and R&D hubs for foundational models to the frontlines of national standard-setting and advanced application testing. Rather than assessing technologies in isolation, we help you decode the underlying infrastructure and economic logic driving this transformation, equipping you with the hard-edged judgment needed to distinguish where capital is truly flowing from where the headlines merely suggest.

A key highlight of this tour that you won't easily find anywhere else is that, leveraging Caixin's deep network, tour participants can have closed-door meetings with **C-level executives and founding team members** of AI and robotics enterprises, including **Moonshot (Kimi) and Zhipu AI (GLM)**. Beyond AI and robotics, participants can also enjoy a rare glimpse into China's **commercial space** industry.

Location: Beijing

Dates: Monday, 19-Friday, 23 October 2026

Programme Fee: USD 14,000 excl. accommodation, USD 15,000 incl. accommodation

ADVANCED MANUFACTURING & SUPPLY CHAIN

Organised by Baiguan

Foshan & Shenzhen | Monday, 26-Friday, 30 October 2026

This journey reveals Chinese manufacturing not as a static cost center, but a dynamic engine of reinvention. From Foshan's industrial titans to Shenzhen's deep-tech disruptors, we trace how legacy giants and frontier startups share the same supply chain soil—driving the national “New Quality Productivity” agenda across smart home appliances, biotech, humanoid robots, and AI. This is not a site visit to assembly lines; it is an investigation into the strategy that allows China to scale from home appliances to humanoid robots with unmatched speed.

Location: Foshan and Shenzhen

Dates: Monday, 26-Friday, 30 October 2026

Programme Fee: USD 9,000 excl. accommodation, USD 10,000 incl. accommodation

EXPERIENCE CHINA SPEED TOUR

Organised by JeeCheeRen

Beijing, Guangzhou & Shenzhen | Sunday, 29 November-Friday, 4 December 2026

The Experience China Speed Tour is a six-day programme exploring China's AI, robotics and future technology ecosystem across three cities: Beijing, Guangzhou and Shenzhen. The organiser describes the programme as providing access beyond the obvious, context beneath the surface and opportunities to connect with change makers.

The programme is structured around three innovation hubs:

- **Beijing:** policy, frontier AI and innovation.
- **Guangzhou:** scale, trade and manufacturing.
- **Shenzhen:** hardware innovation and technology commercialisation. The organiser states that the tour is designed to help participants:

Potential company visits listed by the organiser include organisations such as JD.com, Tencent, WeRide, Galbot, Pony.ai, UBTECH, LimX Dynamics, Dobot, Xiaomi EV Factory, Meituan, Moonshot AI, 01.AI, Ehang and Pudu Robotics.

Dates: Sunday, 29 November-Friday, 4 December 2026

Locations: Beijing, Guangzhou and Shenzhen

Programme Fee: USD 10,000
